

International Adoption Clinic

Purpose: The clinic cares for children adopted from countries outside of Canada. Services include:

- Assessment of the child's medical, behavioral, psychological and developmental needs
- Scheduled visits at 2-3 weeks, 2 months, 6 months and 12 months post arrival in Canada
- Referrals to programs and services that support early intervention

Inclusion Criteria

- Internationally adopted children between the ages of 0-17
- Please note: Dr. Sonia Menard provides pre adoption consultation for prospective internal adoptions which includes parents of children being adopted from a country outside of Canada that wish consultation from a developmental pediatrician prior to having the child in their home

Exclusion Criteria

- Requests for developmental treatment of children who have been adopted from a country outside of Canada.

Referrals accepted from:

Primary Care Physicians
Community Pediatricians
