

PAEDIATRIC GRAND ROUNDS

Alberta Children's Hospital

June 20, 2018 0830 ~ 0930h
Kinsmen Learning Centre Auditorium on 4th Floor
Alberta Children's Hospital

What's New in the Treatment of Primary Immune Deficiency.

Elie Haddad, MD, PhD

Professor of Pediatrics, University of Montreal
Head of the Immunology and Rheumatology Unit
CHU Sainte-Justine, Montreal

Three objective points:

1. to know the basics for the choice of Ig replacement therapy in patients with primary immune deficiency
2. to understand the various type of cellular therapy for primary immune deficiency
3. to understand the various biologics and immunosuppression that are used in patients with primary immune deficiency
